Areas of Research

- **Cancer biology**

Cancer biology is a multifaceted field of research that delves into the complex molecular and cellular mechanisms underlying the development, progression, and treatment of cancer.

Collaborative efforts among researchers, clinicians, industry partners, and patient advocates are driving progress in the fight against cancer and improving outcomes for cancer patients

- **Food Science and Nutrition**

Food Science and Nutrition plays a vital role in advancing knowledge, informing policy, and improving practices to promote a healthy and sustainable food supply, enhance human health, and address global nutrition challenges.

- **Nutrition and Dietetics**

Nutrition and Dietetics plays a critical role in advancing our understanding of the complex interplay between diet, nutrition, and health, and in developing strategies to promote optimal nutrition and well-being across the lifespan.
